SEEDWAY

KNOWLEDGE

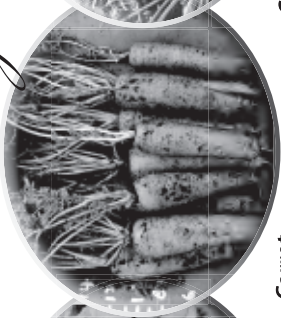

you can trust.

Chinese Cabbage EMIKO Early to mid-season maturity with uniform, medium-sized heads. Has an ideal combination of slow bolting, tipburn tolerance, resistance to bacterial soft rots, gray speck & Club root.

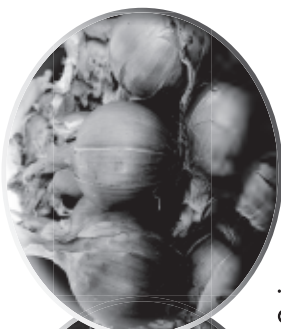

Spinach SPARGO This very dark green spinach has a soft savory and strong stems. Good for spring when it is both vigorous and slow bolting. It can take some heat in late spring.

Carrot FINLEY An earlier Fontana type, with improved tops!

Carrot ANKARA New! Long early carrot for cello pack. Excellent yield and quality for both muck and mineral soils.

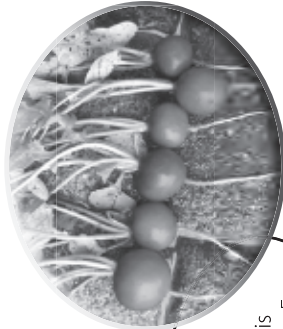

Onion TAHOE This early 100 day onion has uniform shape & size & stores well. Large high round bulbs are mostly single centered with strong skin.

Beet RED CLOUD

Proven reliability, large, dark red interior and very sweet. Smooth skin & shape.

Radish ROVER

This new hybrid radish holds well through a large size and is good in warmer weather. For bunching and cello pack.

Also providing untreated and organic seed!

**YOU WON'T FIND
A BETTER FIT FOR YOUR BUSINESS.**

All across Canada, in more and more fruit and vegetable crops, growers like you are discovering how Dow AgroSciences products fit smart business practices. From scab and mildew to leafrollers and codling moth, we help you control pests and improve profit. Pest control that includes new Delegate™ insecticide. In just its first year in the market, Delegate is already proving itself, delivering exceptional control of a wide range of insects in fruit and vegetable crops. And it's doing it with a Reduced Risk pesticide classification. From exciting new chemistries to the names you know and trust – there's a great fit for your business with horticulture products from Dow AgroSciences.

Local research for proven results

SHAWN JANSE
University of Guelph - Kettleby

Shawn was born and raised in the Holland Marsh. Shawn graduated from the University of Guelph's Associated Diploma in Agriculture in 1990 where he specialized in the horticulture program. Shawn has worked at the Muck Crops Research Station as an Agricultural Technician, and has been the Research Station Manager since the summer of 1999. Shawn is also responsible for the Onion and Carrot Variety Trials conducted at the Research Station. Shawn is one of the Vegetable Judges for the Royal Winter Fair in the Vegetable Sections and in the past helped with setup and display.

KEVIN VANDER KOOI
University of Guelph – Kettleby

Kevin was born and raised in the Holland Marsh. He graduated from the University of Guelph's Associated Diploma in Agriculture program. His main focus of study was Horticulture. Kevin has worked at the Muck Crops Research Station as a summer student, and is currently the Research Technician there.

Kevin is currently the vice-chair of the Ontario Root, Bulbs and Leafy Vegetable Research and Services committee. He is also involved in the Royal Winter Fair in the Horticultural education centre and as an exhibitor.

CHANLI HU
University of Guelph - Guelph

Ms. Chanli Hu is a Msc. student with Dr. Mary Ruth McDonald and Dr. Rong Cao. She received her Master degree in department of Biochemistry at Zhengzhou University in June 2007.

Since September, 2008, Chanli started to pursue graduate study at the University of Guelph. Chanli's current research is focused on the antioxidants in selected vegetable crops in Ontario. She tests the total phenolic content and antioxidant activity of each selected vegetable crops and do an entire profile. To date, she has finished the first year's assessment at the Guelph food research center, AAFC.

JAMIE REAUME

Executive Director - Holland Marsh Growers' Association

Jamie Reaume is the Executive Director of the Holland Marsh Growers' Association, a small, regional group of farmers impacting upon the unique area just north of Toronto. Since July 2008, he has been working to improve conditions for farmers in the Holland Marsh and area, bridging the rural-urban gap, communicating with consumers, media, and government stakeholders, and putting Ontario's Salad (and soup) Bowl back on the map. He is considered a farmer advocate, working for the farming and agricultural community and will continue to do so at the behest of the association's Board of Directors.

RACHEL CARSON

Chief Agronomist - NutriAg Ltd., Toronto

Rachel has a Bachelor of Science in Agriculture as well as Master of Science in Crop, Soil, and Environmental Science, from the University of Arkansas, in Fayetteville, Arkansas. She also has a Master of Science in Plant Molecular Physiology, from the University of Toronto.

During her Bachelor's program, Rachel worked as a Crop Scout in cotton, turf, rice, soybeans, wheat, and corn. During her Master's program in Arkansas, Rachel's primary role was research on new traits to breed into forage and turf grasses. At the U of T she specialized in abiotic stress physiology traits.

Since leaving her formal studies, Rachel has been the Chief Agronomist with NutriAg Ltd. in Toronto, where she is responsible for field research, dealer education and technical client support.

RALPH FREDERICK

Senior Technical Sales Representative - AMVAC

Ralph provides technical and sales support for the Midwest. He has 19 years of soil fumigation experience working with Buckman Laboratories for six years in sales and marketing of agricultural chemical products prior to joining AMVAC 13 years ago. Ralph is a graduate with a bachelors of Science degree in Agronomy with a minor in Agricultural and Natural Resource Economics from Colorado State University

KRISTEN CALLOW

Weed Management - Program Lead, OMAFRA, Ridgetown

On May 1, 2009 Kristen Callow began her role as the new Weed Management Program Lead for Horticulture within the Agriculture Development Branch of the Ontario Ministry of Agriculture, Food and Rural Affairs, working out of OMAFRA's Ridgetown offices.

Kristen has a master's degree in weed science from the University of Manitoba and has more than 12 years experience in the agriculture industry. Most recently, she was the General Manager of the Ontario Greenhouse Vegetable Growers (OGVG). Before working with the OGVG, she served as a vegetable crop specialist with OMAFRA, leading the development, coordination and implementation of various programs related to vegetables in Ontario. She is a past recipient of the Deputy Minister's Award.

She previously spent several years in the private sector with Dow AgroSciences, coordinating and implementing its research trials in support of new product registrations.

KEVIN SANDERSON

Agriculture and Agri-Food Canada – Charlottetown, PEI

Kevin is a Research Scientist at the Crops and Livestock Research Centre, Agriculture and Agri-Food Canada, in Charlottetown, Prince Edward Island. His research focuses on production systems for vegetables, small fruit, and new crops. Research is primarily on fertility and integrated production for crop development, yield, and disease management. Kevin is a graduate of University of PEI and has worked at the Charlottetown Centre since 1975. His team has worked extensive in wild blueberry systems, cole crop and carrot fertility, and more recently developed the first rose hip research program in North America. A career highlight has been the development and promotion of carrot trimmer technology.

MICHAEL T. TESFAENDRIAS

University of Guelph - Kettleby

Michael is a research associate and IPM coordinator at the Muck Crops Research Station. He conducts and participates in research of diseases of vegetable crops, diagnoses plant diseases, runs pest forecasting models and supervises the pest management program. Michael has worked as a plant protection extension officer in Eritrea, as a research assistant and as a laboratory technician in the Dept. of Plant Sciences of the University of the Free State, South Africa. Michael obtained his B.Sc. (Agric.) in 1999 and M.Sc. (Plant Pathology) in 2003 both from University of the Free State, South Africa. In 2006, Michael graduated with a Ph. D. in plant pathology from University of the Free State with a thesis titled 'Grain mould of sorghum with specific reference to grain quality in South Africa'.

MICHAEL WALTERS
Director of Watershed Management, Lake Simcoe
Region Conservation Authority, Newmarket

Michael graduated in 1983 with an Honours Degree in Physical Geography from the University of Western Ontario and has co-authored a number of research and journal publications, and a book on watershed monitoring. Throughout his twenty-five year career, Michael has applied his expertise locally and internationally, developing pollution control strategies, planning policy, integrated watershed plans, and subsequently implemented programs to protect and improve ecosystem health. Most recently, Mike presented at the 12th International Riversymposium and Rivers from Source to Sea conference in Brisbane, Australia where the LSRCA received the prestigious International Thiess Riverprize, the most highly regarded and valuable river management award in the world.

FRANK JONKMAN
Drainage Superintendent – Holland Marsh

Frank was raised in the Holland Marsh, and spent many summers working in the fields. He has worked in a family business for twenty years and has an extensive background in construction and construction management.

Frank has been the Drainage Superintendent for Bradford West Gwillimbury and King Township since 2007. In this time has assisted in the construction of the new Bardawill Pumphouse, the design and implementation of the maintenance barge as well as normal drainage activities.

In 2008, Frank was named the Project Manager for the Holland Marsh Drainage System Canal Improvement Project and he is looking forward to this historic endeavor.

MARY RUTH MCDONALD
University of Guelph - Guelph

Mary Ruth is a Professor in the Dept. of Plant Agriculture, University of Guelph. Her research programs focus on crop protection and integrated crop management of vegetables, including onions, carrots, leafy greens and crucifer crops. The emphasis is on disease forecasting and management, IPM, screening for resistance, and contributing to and developing integrated crop management programs for these crops.

Mary Ruth received her B. Sc., M.Sc. and Ph.D. from the University of Guelph where she specialized in plant protection and plant pathology. She taught Vegetable Production at the Univ. of Guelph for eight years and now teaches Plant Disease Epidemiology and part of the Introduction to Agriculture course for first year students.

Mary Ruth has worked in the Bradford Marsh area of Ontario since 1981: first as a pest management scout, and later as a Pest Management Advisor, research scientist and station manager with the Ontario Ministry of Agriculture, Food and Rural Affairs. She was instrumental in implementing the Integrated Pest Management Program on muck vegetables in Ontario.

SEAN WESTERVELD

Ginseng and Medicinal Herbs Specialist, OMAFRA, Simcoe

Sean joined the Ontario Ministry of Agriculture, Food and Rural Affairs in 2008 as the Ginseng and Medicinal Herbs Specialist. He received B.Sc. (Agr.), M.Sc., and Ph.D. degrees in Horticulture from the University of Guelph from 1996 to 2005. His education focused on plant pathology and plant nutrition. After completing his education, Sean worked as a post-doctoral fellow at the Muck Crops Research Station of the University of Guelph on the Holland Marsh. Sean also worked as a research associate and interim leader of the Vegetable and Non-traditional Crops Research Program at the University of Guelph – Simcoe Research Station from 2007 to June 2008. His research focussed on fertilization and integrated crop management of vegetables and herbs. His primary role in OMAFRA is to support the Ontario ginseng and medicinal herb industries through technology transfer and to provide input into provincial and federal policies that may affect the industry. Sean is also an adjunct professor in the Department of Plant Agriculture at the University of Guelph.

ODILE CARISSE

Agriculture and Agri-Food Canada

Dr. Carisse is a research scientist with Agriculture and Agri-Food Canada since 15 years. She received her B. Sc., M.Sc. and Ph.D. from McGill University where she specialized in plant pathology and epidemiology. Since then, she worked closely with growers to develop integrated disease management programs. Her research is focused on understanding and describing plant diseases. She developed forecasting systems for Cercospora blight of carrot and lettuce downy mildew.

In collaboration with onion growers, she recently developed a novel approach for onion leaf blight management (*Botrytis squamosa*). Dr. Carisse research team developed a method to detect and monitor onion leaf blight airborne inoculum and developed an action threshold that can be used as an early warning of the risk of infection. Combined with forecasted risk, it allowed a reduction of up to 50% of fungicide sprays.

DONNA SPERANZINI

Nutrient Management Program Lead – Horticulture, OMAFRA - Guelph

Donna Speranzini has worked for the Ontario Ministry of Agriculture Food and Rural Affairs for over fourteen years now. She has been involved in pest management and crop production of both field and horticultural crops. Her current position is Nutrient Management Planning Specialist for Horticultural Crops, where she deals with the environmental implications of manure, biosolids and nutrients used in horticultural production systems. She is currently involved the development of conservation and sustainability programs for nutrient management in muck soils and greenhouse operations. She is also involved with the development and delivery of the Canada - Ontario Environmental Farm Plan Program. She has a Masters Degree in Forestry and Environmental Science from the University of Toronto and is a graduate of the Advanced Agricultural Leadership Program.

CHRISTOPH KESSEL

Horticulture Crop Nutrition - Program Lead, OMAFRA - Guelph

Christoph is the Horticulture Crop Nutrition -Program Lead with OMAFRA. After graduating from the University of Guelph, he worked in the nursery industry before joining OMAFRA as the Nursery Crops Specialist. He works with industry associations, researchers and ministry colleagues to improve crop fertility management in horticultural crops through research projects, demonstrations and workshops.

JEFF CRAMPTON

BUSINESS DEVELOPMENT MANAGER – UAP CANADA

Jeff has 30 years in Horticultural and Agricultural business segments. Jeff started with UAP in 1995 with a sales territory for United Horticultural Supply. Jeff has held several positions within UAP including Sales Management, Product Management and Marketing. Jeff is currently involved in Product Development bringing new and novel products to the UAP portfolio and overseeing the regulatory department responsible for obtaining and maintaining registrations in Canada.

Jeff received his Bachelor's of Science in Agriculture from the University of Guelph. When not busy with work Jeff enjoys the challenge of a game he knows he can never master; golf, which might explain why he is involved with regulatory.

FRED CROWE

Fred Crowe Consulting & Oregon State University (retired)

Fred is Emeritus Professor of Botany & Plant Pathology at Oregon State University. He retired from OSU in 2007 after 23 years at the Central Oregon Agricultural Research Center in Madras Oregon. For 14 of those 23 years, Fred was the part-time unit administrator.

In Oregon, Fred conducted research on the biology and control of soil, foliar and seed-borne diseases of seed crops (carrot, onion, various grass seeds) and vegetatively propagated crops (garlic, peppermint, potato). While at OSU, he worked closely with garlic, peppermint and carrot industries throughout the Western U.S. and internationally. Since leaving OSU he continues to consult with growers and industry. In addition, he and a partner in Oregon grow seedstock of specialty hardneck garlic varieties, selling seed nationally and internationally that is free of viruses, nematodes and white rot.

Fred received his B.S. at Stanford University and M.S. and Ph.D. in Plant Pathology at the Univ. of California, Davis, graduating in 1978. Fred spent 6 yrs as an extension specialist on the pathology of horticultural crops, soybeans, corn and sorghum at Kansas State University, relocating to Oregon in 1984. Following retirement, Fred resided No. California, but he recently relocated to the State of Washington.

DOUG TRIVERS, P.Eng.
Ventilation Specialist - Dayson Agricultural Ventilation Ltd. – Richmond Hill

Doug Trivers, owns and operates Dayson Agricultural Ventilation Ltd. which specializes in the design and installation of turn-key ventilation systems for vegetable storage. Dayson has supplied growers in the Bradford March with ventilation and onion drying systems since 1979. Doug's goal is to assist producers in maintaining storage vegetable quality from harvest to market, with a focus on onions, carrots, potatoes, rutabagas and squash.

Prior to joining Dayson, Doug worked as an Agricultural Engineer for the Ontario Ministry of Agriculture, Food and Rural Affairs. During his 10 years with OMAFRA he served as an Energy Specialist developing and promoting efficient energy management and control strategies in agricultural heating and ventilation systems.

Doug is a graduate of the University of Guelph, School of Engineering and is a licensed professional engineer in the Province of Ontario.

CLARENCE SWANTON
University of Guelph - Guelph

Professor Clarence Swanton obtained his B.Sc. in Botany from the University of Toronto in 1975, and his M.Sc. in Agrometeorology from the University of Guelph in 1977. Upon completion of his M.Sc. degree, he was employed by Campbell Soup Company as a Research Assistant from 1977-78. From 1978 to 1985 he joined the Ridgetown College of Agricultural Technology, as a Weed Biologist until 1985, during which time he also completed his PhD in Plant Ecology from the University of Western Ontario. In 1985, he accepted a position in the Department of Crop Science at the University of Guelph as an Assistant Professor of Weed Science. He was promoted to Professor in 1996. From 1998 to 2004, Clarence served as the first Chair of the Department of Plant Agriculture. Professor Swanton is a Fellow of the Canadian Society of Agronomy, the Weed Science Society of America and the Canadian Weed Science Society. Dr Swanton has contributed internationally as a teacher, consultant and as associate editor for several international journals. His research is focussed on the development of integrated weed management systems for field and horticultural crops.

MICHAEL CELETTI
Plant Pathologist, Horticulture Crops - Program Lead, OMAFRA, Guelph

Michael Celetti is the Plant Pathologist, Program Lead - for Horticulture Crops with the Ontario Ministry of Agriculture, Food and Rural Affairs. He is responsible for monitoring provincial plant disease issues as well as transferring current disease management information and technology to the Ontario agriculture industry. After obtaining his undergraduate and graduate degrees in Plant Pathology at the University of Guelph, he spent a short period of time researching potato disease management at the Agriculture University in The Netherlands. Upon returning to Canada, Mike worked as a Plant Pathologist for the Prince Edward Island Potato Marketing Board researching plant disease and nematode management in cereal, forage and legume crops grown in rotation with potatoes. His interest in chemical control of diseases lead him to a position with an international pesticide manufacturing company developing pesticides for the agriculture industry in western Canada. Prior to joining the Ontario Ministry of Agriculture, Food and Rural Affairs in 1998, he was the Provincial Plant Pathologist for Saskatchewan Agriculture and Food. In 2006, Mike received the "Award for Achievements in Plant Disease Management" from the Canadian Phytopathological Society.

Best Wishes For A Successful **MUCK VEGETABLE GROWERS CONFERENCE**

**R.R. 4 BRADFORD, ONTARIO
(905) 775-3356
GROWERS - PACKERS - SHIPPERS**

On Behalf of the Township of King

**Congratulations to the
Holland Marsh Growers Community
on your 59th
Annual Muck Vegetable Growers Conference**

The Township of King cherishes the unique form of agriculture and the rich and varied contributions to our economy, lifestyle and heritage from the Holland Marsh community.

The Holland Marsh is located within both the Township of King and the Town of Bradford West Gwillimbury. In 2007, the two municipalities established the Holland Marsh Drainage System Joint Municipal Services Board to oversee the management, maintenance, and operations of the Drainage System. The new Joint Board represents both municipalities in providing governance to the Holland Marsh community, and joins in extending congratulations and best wishes for continuing success to the Holland Marsh Muck Vegetable Growers Annual Conference.

Yours in Municipal Service,
Margaret Black, Mayor

On behalf of Council, staff and the residents of Bradford West Gwillimbury, I wish to extend special greetings and best wishes to participants and visitors to the 59th Annual Muck Vegetable Growers Conference and Trade Show.

I would also like to take this opportunity to thank the Holland Marsh Horticultural Advisory Committee, volunteers, and others who are involved in putting this conference together. The new technology and innovative ideas that are shared make the Holland Marsh one of the most famous farming communities in the world.

Best wishes for a successful event!

Sincerely yours,
